Ms. Jill Bruss
Missouri Department of Natural Resources
Hazardous Waste Program
P.O. Box 176
Jefferson City, MO 65102

Dear Ms. Bruss:

This letter is to inform you of activity being conducted at Building 5 located on Tract I South. This building is owned by Boeing and housed the power plant operations. On June 19, 2006, cleanup operations began in the building to prepare it for demolition. The operation progressed to subsurface incinerator pits on July 20. During this process water and debris were encountered. Laboratory analysis of the water and sludge indicated the presence of volatiles, semi-volatiles, metals and petroleum constituents. Water and a minor amount of oil from an unknown source continue to infiltrate the pits. When all of the sludge and debris has been removed from the pits, additional samples will be collected to determine if the pits are an Area of Concern and further investigation needs to be conducted.

Please contact me if you need additional information.

Sincerely,

A handwritten signature in cursive script, appearing to read "J. Haake".
